

# PULL CORD SWITCHES

1

1 Ceiling-mounted pull cord switch in cast iron housing, with normally open contacts. Used for interior installation, such as apartment houses, to activate door operator and open or close door from the seat of your car. Operating voltage 24V. A.C. or 120V. A.C. Part No. 50355.

2

2 Designed for use in rugged industrial applications. A pull on the cord from the seat of your vehicle will cause door to open or close. This switch is ideally suited for loading docks, bus garages or transport terminals. Waterproof cast aluminum housing can be installed outside and has rotating - pivoting CAM to accommodate angle of pull. Operating voltage 24V. A.C. or 120V. A.C. Part No. 50350.
